

# Password Reset Solution for IBM i

Feature	How does it help me
Integrates with other iSecurity products	You can seamlessly add <a href="#">Password Reset</a> to your iSecurity suite and get all the benefits of a full audit trail, triggered actions, and so on.
Password templates	Users can be assigned to a specific password template that ensures that all users who need the same type of access have the same level of password security.
Password generation	The passwords that are generated comply with your organization's password policy.
Password Reset classes	Password Reset classes allow you to have different verification policies for different groups of users.
Multi-system	A single reset action allows users to reset their password on all System i systems to which they have access.
Multi-lingual	You can define different languages for different users.
Always available	<a href="#">Password Reset</a> is always available for your users, even during non-standard working hours (late nights, weekends, and so on), in both native and web formats.
